

Lawn Watering

STEP #1 Turn on your sprinklers until you collect 1/2" of water. This can Range from 10 minutes to 2 hours, depending on the type of sprinklers.

STEP #2 The time determined in step #1 becomes duration of irrigation cycle, unless you have run-off. Pulse sprinklers as needed.

STEP #3 Determine how frequently you need to water your lawn. The frequency depends on soil and lawn type.

Daytime Temperatures	Cool season lawns	Warm season lawns
50's	7 to 10 days	14 to 21 days
60's	5 to 7 days	7 to 14 days
70's	3 to 5 days	5 to 7 days
80's	1 to 2 days	3 to 5 days
90 –100's	Daily	Daily to 3 days

STEP #4 These guidelines are just a starting point the best way to see if your lawn needs water is called the finger test. Check the soil with your finger and see if it is still moist. Check about one inch deep.

STEP #5 Adjust your timer as weather changes as often as needed.
